Nanocyn®
Advanced

MicroSafe® Automated 360° Disinfection System

"Antimicrobial efficacy claims relate to the disinfectant (Nanocyn Advanced), not the device itself."

- **RAPID.**
- **NO TOUCH.**
- **MINIMAL DOWNTIME.**
- **HOSPITAL-GRADE DISINFECTANT.**

Use the MicroSafe 360 machine with Nanocyn Advanced, a hospital-grade disinfectant for hard, non-porous surfaces. Based on hypochlorous acid (HOCl), it is ready to use, water based and pH neutral. Operate the machine to the manufacturer's instructions and always follow the Nanocyn Advanced label.

The MicroSafe 360° System Works Quickly:

Misting Duration

Disinfection cycle typically completes in approximately 1 to 2 minutes, depending on room parameters.

Fully Automated Precision

Completely automated, reduces human error and ensures consistent coverage.

After Room Treatment

No wiping or rinsing needed when used as directed.

Rapid Room Reopening

The room can be reopened once the contact time on the disinfectant label has passed.

360° Automated Disinfection Coverage

Applies ARTG listed Nanocyn Advanced across the room in accordance with its directions for use.

Designed With People In Mind

Start the cycle, step out and close the door. Operate to the manufacturer's instructions.
